

DYNAMIC QUANTUM energy system

Selling Guide

Introduction and history of the brand 'Heatstore'

- Established for over 50 years.
- Privately owned electric heating company.

The Dynamic Quantum Heater

- Up to **27%** cheaper to run than comparable static storage heaters.
- Uses off-peak tariffs for low running costs: On a room by room basis it is expected that 90% of the heating requirement will be met by off-peak energy.
- Rapid heat-up time through fan assisted output.
- Automatically adjusts to the user's needs through its dynamic storage capacity.
- Precisely matches the user's chosen heating profile.
- Closely follows target room temperature, intuitively adjusting settings using Dynamic Efficiency+ technology
- Easy-to-use, electronic user interface with LCD display featuring a room temperature setting with seven-day programmer.
- Designed to operate on any off-peak tariff.
- Soft-start, ultra quiet fan for minimum intrusion.
- Boost element ensures heat is always readily available.
- Attractive, state-of-the-art design and compact design (no deeper than a double wet radiator) with flexible mounting options and adjustable feet positions.
- Covers previous 'fixing marks' of most comparably sized traditional storage heaters.
- Free heating design scheme with Dynamic Guarantee.

Safety and Approvals

- CE - The CE mark is the manufacturer's declaration to appropriate enforcement authorities that the product complies with all relevant European Directives.
- BEAB approved - British Electrotechnical Approvals Board (BEAB) have independently tested, passed and approved the Dynamic Quantum.

- EN60335 - Certifies that a product meets the Low Voltage Directive (LVD) series of standards for domestic appliances.
- EMC - Products constructed within standards set by the Electromagnetic Compatibility (EMC) Directive.

Dynamic Heating Schemes

- Available free of charge with no obligation to the customer, computer generated heating schemes with over 650,000 combinations are individually designed to the specific property. This can be from a 1 bedroom flat to a 200 room hotel, offering the same level of high detail and complexity.

Dynamic Warranty

- Full two-year service warranty, at the customers address where in the unlikely event the heater fails, a Heatstore Dynamic technician will arrive to repair or replace the heater at no cost to the customer.

Dynamic Guarantee

- Once our technical team have designed a heating solution and scheme, we are so confident that the Dynamic range of heaters will meet your requirements that, in addition to the two-year service warranty at the customers address, we offer Dynamic customers more; the **Dynamic Guarantee**.
- If for any reason the property does not achieve and hold the designed specified room temperature after installation, we will offer free of charge Dynamic heaters to ensure the design temperature of the scheme is achieved.
